

CLAIM AMENDMENTS

1 - 17. (canceled)

1 18. (currently amended) In a motor vehicle, the
2 combination comprising:

3 a wall formed with a recess;

4 a hand tool adapted to fit with the recess, formed with a
5 throughgoing hole and of a pair of similarly shaped secured-
6 together elements, and including a scraper blade fastened between
7 and projecting at an end from between the elements, the opening
8 being generally circular, at least as large as a standard beverage
9 can, and having elastically deformable lips adapted to grip a
10 standard beverage can fitted in the hole; and

11 latch means for releasably securing the tool in the
12 recess, whereby for use the hand tool, which can form part of a cup
13 holder, can be grasped through the hole and freed from the recess.

1 19. (previously presented) The combination defined in
2 claim 18 wherein the hand tool is an ice scraper.

1 20. (previously presented) The combination defined in
2 claim 18 wherein the vehicle has a center console forming the wall.

1 21. (previously presented) The combination defined in
2 claim 18 wherein the latch means includes a magnet.

22 - 24. (canceled)

1 25. (currently amended) The combination defined in
2 claim [[24]] 25 wherein the hole is at least partially of larger
3 diameter than the standard beverage can.

1 26. (previously presented) The combination defined in
2 claim 18 wherein the tool is provided with a hard edge suitable for
3 use as a scraper.

1 27. (previously presented) The combination defined in
2 claim 18 wherein the tool is elongated and has long sides formed
3 with cutouts facilitating gripping of the tool.

1 28. (previously presented) The combination defined in
2 claim 18 wherein the tool is formed with a seat shaped to
3 releasably retain a coin.

29 and 30. (canceled)

1 31. (previously presented) The combination defined in
2 claim 18, further comprising
3 a light source fixed on the tool; and
4 a battery between the elements connectable to the source.
